About Us

Codes Technology under the umbrella of **Nizmet group** handling IT sectors providing (Web, Mobile, and Desktop Application Development Services) striving to be a known player in its field.

Who is Nizmet Group?
Nizmet group is diversified into many sectors dealing into Metals, Recycling, Real Estate and IT for about 2 decades we are expanding our wings on global platform on service and international trade.

Codes Technology an independently owned, strategic creative agency. **Forever, curious** and **ready to transform** the way business is done. We carry a passion for performance marketing and have a knack for untangling even the toughest of knots. We firmly believe that **SUCCESSFUL** outsourcing is not just a normal offshore development work !
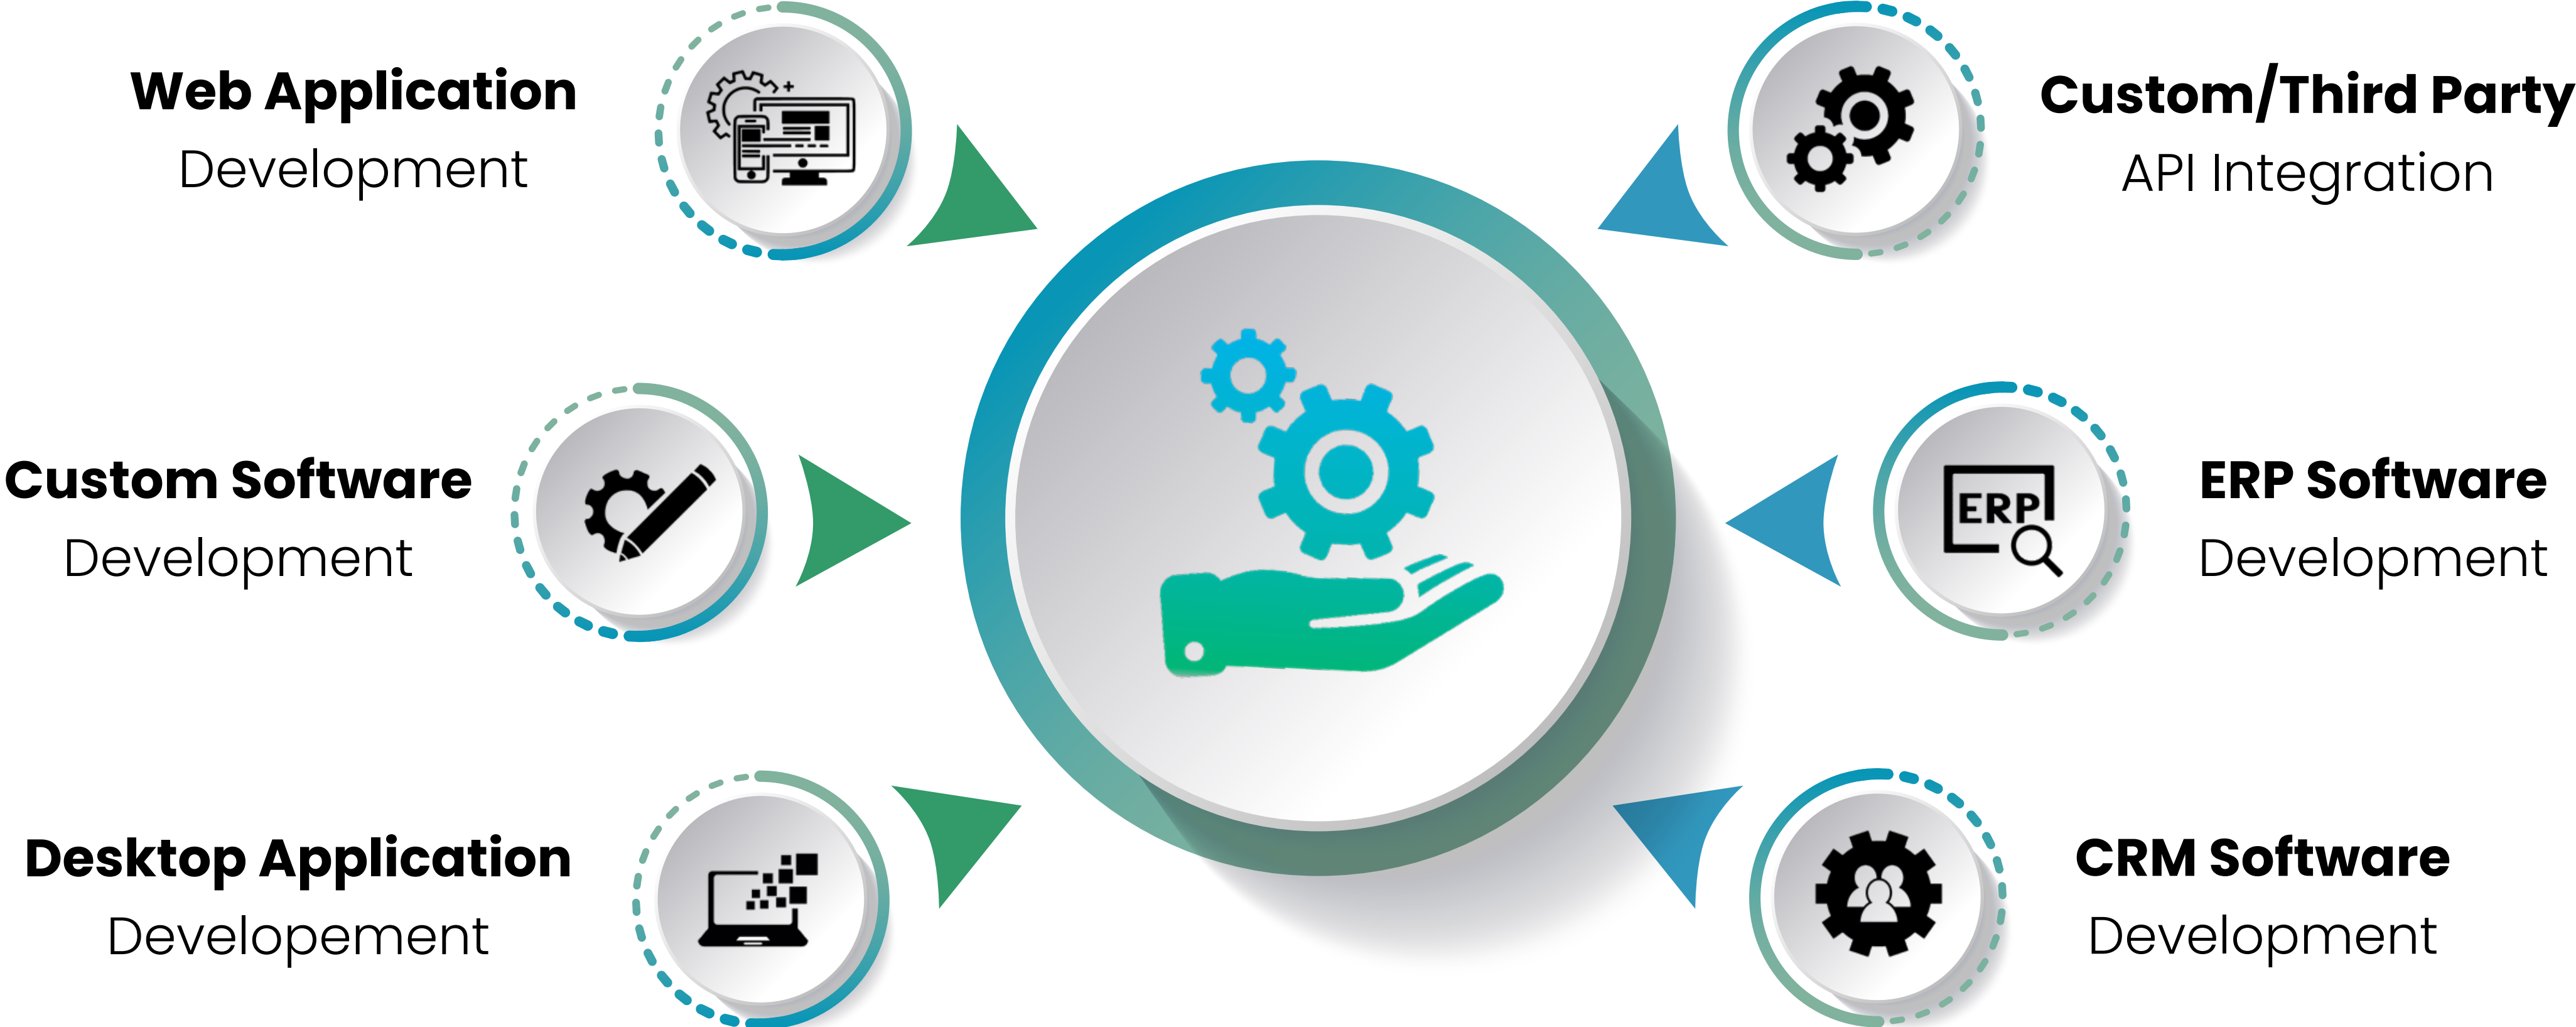

CODES

Our
Company

We build custom SOFTWARE and APPS for our customers to run their business efficiently ! Over the years we have leveraged exceptional technological expertise at affordable prices for niche-based web and mobile app development projects across the globe.

At Codes Technology, we have made it our mission to be known as the one-stop solution for your software development needs, regardless of your business type and size. We are a full-stack offshore software development company having vast experience and providing world-class software. Code technology requires equal contributions from both ends - business insights from clients and technical insights from our end.

Our
Services

Web Application
Development

This service include design and development, testing, and support and maintenance. with our experienced web app developers also help you in technology consultation, modernizing legacy architectures, and migrating to new web architecture.

Custom Software
Development

We are delivering quality customized software solutions for the web and mobile. Our teams design, develop, deploy and maintain software and aim at a predefined set of requirements.

Desktop Application
Developement

We can provide you proven quality process, Flexible pricing options, High-quality final product, 100% confidentiality, Rapid scalability, and flexibility.

Custom/Third Party
API Integration

Our developers give clients the ability to connect their custom applications with external systems either in-network or cloud. This helps speed up development time and cut costs.

ERP Software
Development

This service will help you to bring transparency on business operations, monitor financial activities, and streamline internal business processes. These operations include manufacturing, supply chain management, and human resources.

CRM Software
Development

We develop CRM applications across industries like Insurance, Real Estate, Retail, Logistics, Healthcare, Education, Travel, Transportation, etc.

CODES

Why Choose Us?

With years of experience in the software development industry, we have gained expertise in a wide spectrum of technologies, applications, and industries. Our clients are at the heart of everything we do, and we take pride to mold our clients' needs.

Ideas

We select an idea that transforms businesses based on its nature and working model.

Technology

As per the requirements of clients, we fit them well in its functionality.

Synergy

We always keep transforming enterprise software companies for their business growth.

Building Trusted Partners

We chose to be in very close association with the client to maintain transparency & to ensure better results.

Agile Application

Agile synonymously runs in our veins, and hence, enterprise software development methodology

Empower Our Teams

Offer creative space for our team so that they can come up with an innovative approach in the project.

CODES

How We Work

We have embraced the majority of the widely used open source web development platform.

Fully devoted to the project

In Codes Technology we hired highly educated software developers & provide them encouraging environment so they can represent their best potential & skill.

Stable demo environment

We are providing the demo with a test or real data. We are making a staging website first and later on once client approve we will apply the changes to the LIVE website

All the team is aligned

Early discussion in the morning on a regular basis at the office. We planout the stuff and any challenge that has to be faced during the week. We have set the culture and also believe that communication is the key to execute the requirement of clients. Thus we company organize events regularly in which different teams participate and share ideas.We will make sure that group work sustain with sharing sessions, code reviews and daily discussion.

Agile software development

Our team follow scrum methodology so all participate along with the client will be stayed in loop.
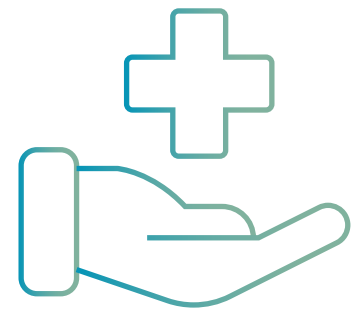

QA and testing

Testing & validation are very important part of the development so we have hired dedicated resources for tester role.

Code is always accessible - GIT/SVN

Code is the intellectual property so we keep them accessible and secured with GIT or BitBucket.
